

Reflect on what you have learnt this lesson. Create a summary and action plan of your key points.

My key learning points this lesson:

Consider the following eco-actions that help prevent the effects of de-forestation:

1. Plant a Tree where you can.
2. Go paperless at home and at school.
3. Buy recycled products and then recycle them again.
4. Buy certified food products.
5. Support the products of companies that are committed to reducing deforestation.
6. Raise awareness in your circle and in your community.

Using your key learning points and action plan and the above eco-actions, evaluate and identify areas that can be changed in your life:

## Mission Assignment: Explore how to curtail deforestation

NATIONAL NUCLEAR  
LABORATORY

Code:

Research some of the species that live in the Amazon rainforest. This could be an animal, a plant, an insect, or an organism. Fill out the space below with information you think will be useful to know.

Picture of my  
chose species:

Using the information that you have found out, write a short paragraph on the impact that deforestation has or will have on this species.
