

Consider your school’s upstream emissions and how you can have a say in minimising them. Work together to investigate the supply chain of your school, filling out the below action plan with your findings.

Who supplies your energy and is it supplied responsibly?	
Who supplies your water and is it supplied responsibly?	
Who supplies your classroom equipment and are they supplied responsibly?	
Who supplies your catering and is it supplied responsibly?	
Who supplies your transportation needs and is it supplied responsibly?	

Choose one of the following tasks to help make positive changes to your school’s supply chain:

Write a supply chain policy

Design a communications strategy

Create an action plan to measure your company’s Emissions supply Chain

Write an action plan which works towards global net zero.

Taking the supply chain emissions of your current school into account, design an eco-school and an eco-school system.

Evaluate your eco-school with your current school in mind. How achievable is this?
