

Mission Assignment: Explore the Paris Rulebook and how it impacts my daily life at school

NATIONAL NUCLEAR LABORATORY

Code: COP26S-04_01

Create your own Paris Agreement for your school which everyone can get involved with.

What will your Paris Agreement include?

How will you make sure everyone follows the rules you have laid out? What steps will you need to take to implement it? Think about events to raise awareness and campaigning for your own Paris Agreement.

Swap your completed Paris agreement with a partner. Provide feedback on their plan, including 2 things that you like and 2 things that you think they could improve on.

Create a critical analysis of the actions of one of the countries currently part of the Paris Agreement.

Choose one of the countries that is part of the agreement. Do you believe their efforts to be enough? If so, why? If not, what else do you think they should be doing?

Consider this country's largest industries, their current emissions in relation to their population, and its relationships with other countries.
