

Investigate the eco-policies at your school. Create a business design that represents your school's eco-commitments.

Create a video script which captures your school's eco-journey so far. What has worked well and what has not worked well?

Present some solutions to what you think does not work well at school.

Choose a problem that your business will face from the list below-

- Classmates taking short cuts, preventing things working smoothly.
  - Lack of funding available to finance eco-materials.
  - Lack of appropriate training.
  - Team not motivated.

Using this problem, devise an action plan to combat it. Consider advice from similar local organisations, attending drop-in sessions, training sessions and support groups as potential solutions.
