

Understand human impact on the environment

You are going to research one of the following issues and present a live news report to your class or write a newspaper column about it.

Disaster report

oil spills

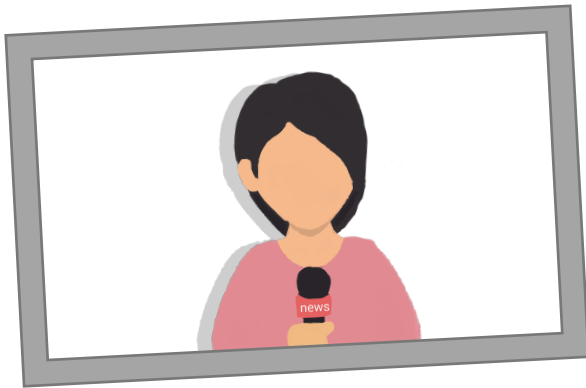

climate change

deforestation

overfishing

Great Pacific
Garbage Patch

Aral Sea drying up

Your report should include:

- **Overview** – a description of the issue
- **Who** – who is affected?
- **What** – what caused the issue?
- **Where** – where did it happen?
- **When** – when did it begin?
- **Why** – why is it important we deal with the issue?

Stretch:

Should your report be persuasive or informative?
Explain your idea.

Challenge:

How do news reports help solve problems?
